Development

HTML
CSS
Python

Honours

DTU Green Challenge

Developed a mobile app (Android) to reduce food waste, selected to present in front of investors

Interaction 2024, Tokyo

AI-copilot storytelling for children, conference paper selected

DTU Finalist X-Tech Entrepreneurship

AI-driven startup, awarded one week of workshops in Silicon Valley (Nvidia, Plug & Play offices), UC Berkeley and Stanford

Interests

Travel filmmaking
Solo backpacking
Photography

Product Designer with **5 years** of experience taking products end-to-end, from ambiguous problem and abstract problem-solving to shipped, high-fidelity work with business impact. I bring clarity where complexity has to become one simple, glanceable action: framing the problem with product and engineering first, testing early, and designing to each platform's conventions and constraints rather than around them. AI is an active part of that workflow, from insight synthesis to rapid prototyping. I hold a high bar for the last 5% — interaction detail, motion, feedback and visual hierarchy.

Experience

UX Designer | Nacos Marine (formerly Wärtsilä)

Jan 2023 – Dec 2025 · Copenhagen

- Led and shipped end-to-end UX design and product strategy for new vessel monitoring interfaces across web, desktop and HMI, from discovery and abstract problem-solving through to high-fidelity final treatments, designed to each platform's conventions and constraints. Delivered to **13 000+ ships** globally, supporting **30k+ daily active users**.
- Cut time-to-task execution by **70%** by turning high-volume, high-stakes data into a single glanceable decision — dashboards and monitoring panels handling **70+ active data points** per single page.
- Partnered with engineers to ship features inside real technical constraints, and with product owners across countries to define customer needs and product strategy, lowering time-to-critical decision and cognitive load.
- Reduced development uncertainty by solving ambiguous problems early: led discovery interviews and usability testing across enterprise and consumer products, and facilitated co-creation workshops and design reviews that aligned stakeholders on problem framing and solution direction.
- Validated interaction decisions before build by designing high-fidelity mockups and prototyping with real data, not placeholder content.
- Increased engineer productivity and scoped down long manuals by architecting user-centric (HCI) workflow improvements and design systems across legacy interfaces.
- Won repeat business, a customer ordering a second interface after a successful release, by designing novel end-to-end patterns for vessel navigation that held the brand identity and presenting the work directly to major customers.

UX/UI Designer | Cytiva

May 2021 – Jan 2023 · Krakow

- Cut daily task-completion time by **30%** for **500+ employees** by leading the redesign of the internal hour-tracking system.
- Designed, co-developed and delivered an end-to-end new desktop customer-ordering tool.
- Simplified equipment ordering for sourcing specialists by redesigning procurement dashboards, informed by qualitative user research.
- Helped maintain a design system.
- Partnered with business analysts, developers and project managers, co-designed the company's internal employee website and presented work to customers.

Education

MSc Human-Centered Artificial Intelligence | Technical University of Denmark

Aug 2022 – Mar 2025

Human-centered design, interaction design, accessibility, data visualization, ML foundations. Thesis: a dashboard using data from a wearable button to improve treatment for patients with mental health disorders.

MEng Applied Computer Science | AGH University of Science and Technology

Feb 2021 – Aug 2022

Software engineering, HCI, front-end development. Thesis: ticket platform redesign for **1000+ students**.

Member of BEST AGH Krakow. Coordinated the design team for a Europe-wide conference of **400+ attendees** and grew local recruitment applicants by **15%**.

Exchange student | University of Tokyo · NOVA University of Lisbon

2023/2024 · 2022

HCI, sense of agency.
