(+48) 600 627 119

Skills

Design

End-to-end product design
UI & visual design
Interaction design
Prototyping & fast iteration
Design systems & components
User research & usability testing
A/B testing & experimentation
Data-driven insights
Information architecture
Human-centered design
Wireframing & sketching
Accessibility (WCAG)
Data visualization
Human-computer interaction
Agentic AI & LLMs

Tools

Figma, FigJam, ProtoPie, Framer, Miro, Notion, Jira, Confluence, Adobe CC

AI tools

Figma Make, Claude Design, Google Stitch, Claude Code, Codex

Development

HTML, CSS, Python

Languages

Polish (native), English (fluent)

Honours

DTU Green Challenge

0-to-1 mobile app (Android) to reduce food waste, shipped in **8 weeks** and selected to present in front of investors

Interaction 2024, Tokyo

AI-copilot storytelling for children, conference paper selected

DTU Finalist X-Tech Entrepreneurship

AI-driven startup, awarded one week of workshops in Silicon Valley (Nvidia, Plug & Play offices), UC Berkeley and Stanford

Interests

Photography, travel filmmaking, solo backpacking

Product Designer with **5 years** of experience owning products end-to-end, from ambiguous problem to shipped flow, across web, desktop and mobile. I work where usability meets hard constraints, technical, accessibility and platform, and my job is to turn them into experiences that are simple, consistent and scalable. I prototype and iterate fast, back decisions with user research and data, and present the reasoning to senior stakeholders in the language of product and engineering. I use AI tools daily to explore more directions in less time.

Experience

UX Designer | Nacos Marine (formerly Wärtsilä)

Jan 2023 – Dec 2025 · Copenhagen

- Owned UI and UX end-to-end for new vessel monitoring products across web, desktop and HMI, turning complex technical requirements into flows that are simple, consistent and accessible under high pressure. Delivered to **13 000+ ships** globally, supporting **30k+ daily active users**.
- Cut time-to-task execution by **70%** by transforming high-volume data into high-impact dashboards and monitoring panels handling **70+ active data points** per single page.
- Made a sprawling product consistent and scalable by restructuring the information architecture, cutting navigation depth from **4-5 levels of nested menus to 2** and consolidating **22 functions into 10**, which got operators off the manual for their core tasks.
- Set the UI and UX pattern bar across legacy interfaces by evolving design systems and architecting user-centric (HCI) workflow improvements, which raised engineer productivity.
- Prototyped and iterated concepts quickly, testing interaction decisions on real data before build, and grounded direction in discovery interviews and usability testing across enterprise and consumer products.
- Influenced stakeholders at all levels by pitching design ideas with a balance of data-driven insight and design intuition, and facilitated co-creation workshops with product owners, engineers and researchers across countries that aligned everyone on direction.
- Won repeat business, **a customer ordering a second interface after a successful release**, by designing novel end-to-end patterns for vessel navigation that held the brand identity, and presenting the work directly to major customers.

UX/UI Designer | Cytiva

May 2021 – Jan 2023 · Krakow

- Cut daily task-completion time by **30%** for **500+ employees** by leading the redesign of the internal hour-tracking system.
- Designed, co-developed and delivered an end-to-end new desktop customer-ordering tool, moving between Figma and frontend code to get the best result.
- Simplified equipment ordering for sourcing specialists by redesigning procurement data dashboards, informed by qualitative research run directly with users.
- Maintained and extended a design system with other designers, keeping UI patterns consistent as the surface grew.
- Partnered with business analysts, developers and project managers, co-designed the company's internal employee website and presented work to customers.

Education

MSc Human-Centered Artificial Intelligence | Technical University of Denmark

Aug 2022 – Mar 2025

GPA **10.56/12**. Human-centered design, interaction design, data visualization, accessibility, ML foundations. Thesis: a dashboard using data from a wearable button to improve treatment for patients with mental health disorders.

MEng Applied Computer Science | AGH University of Science and Technology

Feb 2021 – Aug 2022

Software engineering, HCI, front-end development. Thesis: ticket platform redesign for **1000+ students**.

Member of BEST AGH Krakow. Coordinated the design team for a Europe-wide conference of **400+ attendees** and grew local recruitment applicants by **15%**.

Exchange student | University of Tokyo · NOVA University of Lisbon

2023/2024 · 2022

HCI, sense of agency.
