

# Gabriela Penarska

## Product Designer

gabriela.penarska@gmail.com

Portfolio: gabrielapenarska.framer.website

linkedin.com/in/gabriela-penarska

(+48) 600 627 119

## Skills

### Design

End-to-end product design

UI & visual design

Interaction design

Prototyping

User research & usability testing

Human-centered design

Design systems & components

A/B testing & experimentation

Data-driven insights

Information architecture

Wireframing & sketching

Accessibility (WCAG)

Human-computer interaction

Data visualization

Agentic AI

### Tools

Figma, ProtoPie, Framer, Miro, Notion, Adobe

CC

### AI tools

Figma Make, Claude Design, Google Stitch,

Claude Code, Codex

### Development

HTML, CSS, Python

### Languages

Polish (native), English (fluent)

## Honours

### DTU Green Challenge

0-to-1 mobile app (Android) to reduce food waste, shipped in **8 weeks** and selected to present in front of investors

### Interaction 2024, Tokyo

AI-copilot storytelling for children, conference paper selected

### DTU Finalist X-Tech Entrepreneurship

AI-driven startup, awarded one week of workshops in Silicon Valley (Nvidia, Plug & Play offices), UC Berkeley and Stanford

## Interests

Photography, travel filmmaking, solo backpacking

Product Designer with **5 years** of experience owning products end-to-end, from ambiguous problem to shipped interface, across web, desktop and mobile. I design for effectiveness and for craft: high-fidelity UI backed by user research, prototyping and data, delivered inside real engineering constraints. I work closest with product managers and engineers, framing the problem before the pixels, and I sweat the details that make a product feel obvious.

## Experience

### UX Designer | Nacos Marine (formerly Wärtsilä)

Jan 2023 – Dec 2025 · Copenhagen

- Led and shipped end-to-end UX and UI design for new vessel monitoring interfaces across web, desktop and HMI, designing to each platform's constraints while holding one recognisable product identity, and translating complex technical requirements into intuitive, accessible systems that build user trust under high pressure. Delivered to **13 000+ ships** globally, supporting **30k+ daily active users**.
- Cut time-to-task execution by **70%** by transforming high-volume data into high-impact dashboards and monitoring panels handling **70+ active data points** per single page.
- Kept customers at the core of the design: led discovery interviews and usability testing across enterprise and consumer products, and facilitated iterative co-creation workshops that aligned stakeholders on problem framing and solution direction.
- Validated interaction decisions before build by prototyping with real data rather than placeholder content, testing alternative patterns until the simplest one held up.
- Cut navigation depth from **4-5 levels of nested menus to 2** and consolidated **22 functions into 10** by restructuring the information architecture, reducing operators' reliance on the manual for core tasks.
- Proposed and shipped feature improvements by working shoulder-to-shoulder with product owners, engineers and developers across countries, defining customer needs and product strategy and lowering time-to-critical decision and cognitive load.
- Won repeat business, a customer ordering a second interface after a successful release, by designing novel end-to-end patterns for vessel navigation that held the brand identity, and presenting the work directly to major customers.

### UX/UI Designer | Cytya

May 2021 – Jan 2023 · Krakow

- Cut daily task-completion time by **30%** for **500+ employees** by leading the redesign of the internal hour-tracking system.
- Designed, co-developed and delivered an end-to-end new desktop customer-ordering tool.
- Simplified equipment ordering for sourcing specialists by redesigning procurement data dashboards, informed by qualitative user research.
- Helped maintain a design system with other designers.
- Partnered with business analysts, developers and project managers, co-designed the company's internal employee website and presented work to customers.

## Education

### MSc Human-Centered Artificial Intelligence | Technical University of Denmark

Aug 2022 – Mar 2025

Human-centered design, interaction design, data visualization, accessibility, ML foundations.

Thesis: a dashboard using data from a wearable button to improve treatment for patients with mental health disorders.

### MEng Applied Computer Science | AGH University of Science and Technology

Feb 2021 – Aug 2022

Software engineering, HCI, front-end development. Thesis: ticket platform redesign for **1000+ students**.

Member of BEST AGH Krakow. Coordinated the design team for a Europe-wide conference of **400+ attendees** and grew local recruitment applicants by **15%**.

### Exchange student | University of Tokyo · NOVA University of Lisbon

2023/2024 · 2022

HCI, sense of agency.
