Honours

DTU Green Challenge

0-to-1 mobile app (Android) to reduce food waste, shipped in **8 weeks** and selected to present in front of investors

DTU Finalist X-Tech Entrepreneurship

AI-driven startup, awarded one week of workshops in Silicon Valley (Nvidia, Plug & Play offices), UC Berkeley and Stanford

Interaction 2024, Tokyo

AI-copilot storytelling for children, conference paper selected

Interests

Photography
Travel filmmaking
Solo backpacking

Product Designer with **5 years** of experience taking commercial and technical systems end-to-end, from ambiguous problem to shipped products with business impact, across web, desktop and mobile. My mission is to bring clarity to complex problems — restructuring dense information architecture into simple, elegant solutions — by owning the full process, with a human-centered approach and collaboration at its heart. I pay close attention to detail, with an eye on product strategy and the technical side of what I design.

Experience

UX Designer | Nacos Marine (formerly Wärtsilä)

Jan 2023 – Dec 2025 · Copenhagen

- Led and shipped end-to-end UX design and product strategy for new vessel monitoring interfaces (web, desktop and HMI), translating complex technical constraints and requirements into intuitive and accessible systems that build user trust under high pressure. Delivered to **13 000+ ships** globally, supporting **30k+ daily active users**.
- Cut navigation depth from **4-5 levels of nested menus to 2** and consolidated **22 functions into 10** by restructuring the information architecture of the system, reducing operators' reliance on the manual for core tasks.
- Cut time-to-task execution by **70%** by transforming high-volume data into high-impact dashboards and monitoring panels handling **70+ active data points** per single page.
- Reduced development uncertainty by solving ambiguous problems early: led discovery interviews and usability testing across enterprise and consumer products, and facilitated iterative co-creation workshops and design reviews that aligned stakeholders on problem framing and solution direction.
- Increased engineer productivity by architecting user-centric (HCI) workflow improvements and design systems across the legacy interfaces.
- Lowered time-to-critical decision and cognitive load by collaborating cross-functionally with product owners, engineers and developers from different countries to define customer needs and product strategy.
- Won repeat business, a customer ordering a second interface after a successful release, by designing novel end-to-end patterns for vessel navigation that held the brand identity and presenting the work directly to major customers.

UX/UI Designer | Cytiva

May 2021 – Jan 2023 · Krakow

- Cut daily task-completion time by **30%** for **500+ employees** by leading the redesign of the internal hour-tracking system.
- Designed, co-developed and delivered a new end-to-end B2B SaaS customer-ordering tool for desktop.
- Simplified equipment ordering for sourcing specialists by redesigning B2B SaaS procurement data dashboards, informed by qualitative user research.
- Helped maintain a design system.
- Partnered with business analysts, developers and project managers, co-designed the company's internal employee website and presented work to customers.

Education

MSc Human-Centered Artificial Intelligence | Technical University of Denmark

Aug 2022 – Mar 2025

Human-centered design, data visualization, accessibility, interaction design, ML foundations. Thesis: a dashboard using data from a wearable button to improve treatment for patients with mental health disorders.

MEng Applied Computer Science | AGH University of Science and Technology

Feb 2021 – Aug 2022

Software engineering, HCI, front-end development. Thesis: ticket platform redesign for **1000+ students**.

Member of BEST AGH Krakow. Coordinated the design team for a Europe-wide conference of **400+ attendees** and grew local recruitment applicants by **15%**.

Exchange student | University of Tokyo · NOVA University of Lisbon

2023/2024 · 2022

HCI, sense of agency.
