Development

HTML
CSS
Python

Honours

DTU Green Challenge

Developed a mobile app (Android) to reduce food waste, selected to present in front of investors

DTU Finalist X-Tech Entrepreneurship

AI-driven startup, awarded one week of workshops in Silicon Valley (Nvidia, Plug & Play offices), UC Berkeley and Stanford

Interaction 2024, Tokyo

AI-copilot storytelling for children, conference paper selected

Interests

Photography
Travel filmmaking
Solo backpacking

Product Designer with **5 years** of experience taking consumer and enterprise products end-to-end, from ambiguous problem to shipped experience with business impact. I own the full arc, from discovery through interaction and UI craft to the hand-off into code, with a human-centered approach and collaboration at its heart. AI is an active part of that workflow, from insight synthesis to rapid prototyping. I hold a high bar for detail and product strategy.

Experience

UX Designer | Nacos Marine (formerly Wärtsilä)

Jan 2023 – Dec 2025 · Copenhagen

- Led and shipped end-to-end UX design and product strategy for new vessel monitoring interfaces (web, desktop and HMI), translating complex technical constraints and requirements into intuitive and accessible systems that build user trust under high pressure. Delivered to **13 000+ ships** globally, supporting **30k+ daily active users**.
- Cut time-to-task execution by **70%** by holding a high craft bar on hierarchy, layout and interaction detail, transforming high-volume data into high-impact dashboards and monitoring panels handling **70+ active data points** per single page.
- Identified product opportunities and reduced development uncertainty by solving ambiguous problems early: led discovery interviews and usability testing across enterprise and consumer products, and facilitated iterative co-creation workshops and design reviews that aligned stakeholders on problem framing and solution direction.
- Won repeat business, a customer ordering a second interface after a successful release, by pushing for the right end-to-end patterns for vessel navigation, holding the brand identity and presenting the work directly to major customers.
- Lowered time-to-critical decision and cognitive load by collaborating cross-functionally with product owners, engineers and developers from different countries to define customer needs and product strategy.
- Increased engineer productivity and scoped down long manuals by architecting user-centric (HCI) workflow improvements and design systems across the legacy interfaces.

UX/UI Designer | Cytiva

May 2021 – Jan 2023 · Krakow

- Cut daily task-completion time by **30%** for **500+ employees** by leading the redesign of the internal hour-tracking system.
- Designed, co-developed and delivered an end-to-end new desktop customer-ordering tool.
- Simplified equipment ordering for sourcing specialists by redesigning procurement data dashboards, informed by qualitative user research.
- Partnered with business analysts, developers and project managers, co-designed the company's internal employee website and presented work to customers.
- Helped maintain a design system.

Education

MSc Human-Centered Artificial Intelligence | Technical University of Denmark

Aug 2022 – Mar 2025

Human-centered design, data visualization, accessibility, interaction design, ML foundations. Thesis: a dashboard using data from a wearable button to improve treatment for patients with mental health disorders.

MEng Applied Computer Science | AGH University of Science and Technology

Feb 2021 – Aug 2022

Software engineering, HCI, front-end development. Thesis: ticket platform redesign for **1000+ students**.

Member of BEST AGH Krakow. Coordinated the design team for a Europe-wide conference of **400+ attendees** and grew local recruitment applicants by **15%**.

Exchange student | University of Tokyo · NOVA University of Lisbon

2023/2024 · 2022

HCI, sense of agency.
