Honours

DTU Finalist X-Tech Entrepreneurship

AI-driven startup, awarded trip to Silicon Valley, UC Berkeley, Stanford

Interaction 2024, Tokyo

AI-copilot storytelling for children, conference selected

DTU Green Challenge

Mobile app (Android) reducing food waste, selected

Interests

Filmmaking
Photography
Backpacking around the world

Product Designer with **4+ years** of experience taking commercial and technical products end-to-end, driving a human-centered process from ambiguous problem to shipped web, desktop and HMI interfaces. My mission is to bring clarity to complex systems and make people's work easier — turning hard problems into simple, elegant solutions and sweating the small details, with an eye on product strategy and the technical side of what I design. Now focused on developing my skills further with data-dense dashboards and ambiguous problems.

Experience

UX Designer | Nacos Marine (formerly Wärtsilä)

Jan 2023 – Dec 2025 · Copenhagen

- Leading and shipping end-to-end UX design and product strategy for new vessel monitoring interfaces (web, desktop and HMI), translating complex technical constraints and requirements into intuitive and accessible systems that build user trust under high pressure. Delivering to **13 000+ ships** globally, supporting **30k+ daily active users**.
- Solving ambiguous and complex problems, and validating product concepts by facilitating iterative co-creation workshops, user interviews, usability testing sessions and design reviews to reduce development uncertainty.
- Transforming high-volume data into high-impact dashboards and monitoring panels, handling **70+ active data points** per single page and reducing time-to-task execution by **70%**.
- Architected user-centric (HCI) workflow improvements and design systems across the legacy interfaces, leading to increased engineer productivity and scoping down long manuals.
- Collaborating cross-functionally with product owners, engineers and developers from different countries to define customer needs and product strategy, reduce cognitive load and measurably lower time-to-critical decision.
- Designed end-to-end novel design patterns for vessel navigation while maintaining brand identity.

UX/UI Designer | Cytiva

May 2021 – Jan 2023 · Krakow

- Designed, co-developed and delivered an end-to-end new desktop customer-ordering tool.
- Led redesign of the internal hour-tracking system, cutting daily task-completion time by **30% for 500+ employees**.
- Redesigned procurement data dashboards for sourcing specialists, simplifying equipment ordering through qualitative user research.
- Helped maintain a **design system of 500+ components**, keeping products consistent across platforms.
- Partnered with business analysts, developers and project managers, and co-designed the company's internal employee website.

Event Coordinator & PR Specialist | BEST AGH Krakow

Mar 2018 – May 2020 · Krakow

- Coordinated the design team for a Europe-wide conference of **400+ attendees**.
- Led the marketing strategy for local recruitment, **increasing applicants by 15%**.

Education

MSc Human-Centered Artificial Intelligence | Technical University of Denmark

Aug 2022 – Mar 2025

Human-centered design, data visualization, accessibility, interaction design, ML foundations. Thesis: data visualization in a medical dashboard.

MEng Applied Computer Science | AGH University of Science and Technology

Feb 2021 – Aug 2022

Software engineering, HCI, front-end development. Member of BEST AGH Krakow. Thesis: ticket platform redesign.

Exchange student | University of Tokyo · NOVA University of Lisbon

2023/2024 · 2022

HCI, sense of agency.
